TESTIM PRODUCT SPECIFIC TERMS

These Product-specific terms supplement the Tricentis General Terms of Use and supersede any conflicting terms for Testim:

1. **Definitions**. The following additional definitions apply:
   - **"Run"** means a single test execution using Testim's platform or command line interface tool.
   - "**Parallel Run**" means two or more concurrent testing of Runs, each counting as a Run for the purposes of calculating the Run Limitation.
   - "**Run Limitation**" means the maximum number of Runs and/or Parallel Runs per month that you are entitled to use.

2. **Run Limitations**. The applicable Run Limitation for paid subscriptions is set forth in the Order and will be calculated in the aggregate with respect to all Runs performed by Customer's Users. If you exceed the applicable Run Limitation for a paid subscription, unless a **Run Limitation Exception** applies, you must pay for one or more increments of 500 Runs until the excess Runs have been covered. The price for each increment of 500 Runs will be 200% of the then-current list price (converted to a monthly price) of Testim Essential at the 500 Monthly Test Runs tier.

   Run Limitation Exceptions:

   1. You may exceed the Run Limitation for a paid subscription by up to 50% during the first three months of an initial subscription term but not during a renewal term; or

   2. For paid renewal subscriptions, you may exceed the Run Limitation by up to 50% for a single month of a 12-month renewal term.

Testim Community Free Plan. The Testim Community Free Plan is subject to the terms of the Limited Use Licenses section of Tricentis's General Terms of Use. The Testim Community Free Plan is limited to a single account per organization. The Run Limitation is 500 Runs per month with no Parallel Runs and will be calculated in the aggregate with respect to all Runs performed by Customer's Users. If you exceed this Run Limitation, you must upgrade to a paid subscription or your account functionality will be limited.
