

# Tricentis Academy

## World class training and continuous education

Continuous Testing isn't a product you can acquire and deploy—it's achieved through a deeper transformation involving people, processes, and technologies.

Tricentis provides the technologies, services, and training needed to achieve true Continuous Testing. Whether you're looking to get started with test automation, scale your initial successes, or master advanced Continuous Testing practices, Tricentis Academy can help.

Tricentis Academy is designed with enterprise needs in mind. Working with over 500 Global 2000 organizations, we have developed an extensive library of content—and can rapidly tailor it to suit your precise needs. From on-site trainings conducted across all major regions worldwide, to anytime anywhere access via an online portal that can be customized for your organization, we are experienced in making expert training broadly available throughout large organizations. Our industry-recognized certification program has already helped 19,000+ testers accelerate testing for Agile and DevOps – and we're continuously expanding the program to address new roles, specializations, and topics.

### Extensive Coursework on Test Automation Best Practices

Our test automation experts have developed interactive training materials across a broad range of test automation and Continuous Testing topics – from getting started with test automation, to SAP testing best practices, to advanced service virtualization scenarios. Start with a core set of courses and paths, and customize the plan for your specific needs.

### Role-Based Learning Paths

Our test automation experts have developed interactive training materials across a broad range of test automation and Continuous Testing topics – from getting started with test automation, to SAP testing best practices, to advanced service virtualization scenarios. Start with a core set of courses and paths, and customize the plan for your specific needs.

Current paths include:

- Automation Specialist 1 & 2
- Automation Engineer 1 & 2
- Test Design Specialist 1 & 2
- Test Architect

### Industry-Leading Content

Select from a broad array of core topics; we'll customize & extend the foundation to suit your unique needs.

### Relevant for All Roles

Learning opportunities are available for everyone – from manual testers to expert test automation engineers

### Many Ways to Learn

Multiple formats help you achieve your goals efficiently and effectively. Live, online, instructor-led, self-paced...

### Continuous Insight into Progress

Intuitive dashboards provide real-time insight into progress at the organization, team, and individual level.

## Multiple Learning Formats

Interactive, hands-on learning experiences are delivered in a variety of formats to meet different corporate needs and learning styles:

Training Format	Training Format
On-site classroom training*	Live instructor-led training at a time and location of your choice. Can include boot camps and workshops.
Public classroom training*	Live instructor-led training at a time and location determined by Tricentis.
Self-paced online learning*	Each learner completes interactive coursework at their own pace—anytime, anywhere.
MOOCs	Free hour-long “Massive Open Online Courses” that explore targeted topics and best practices.
Video Tutorials	Free step-by-step tutorials that cover the basics of test automation with Tricentis Tosca.
Tricentis YouTube Channel	Provides additional content, interviews and selected videos from the online training program.

\*Offers certification opportunities

## Powerful Dashboards and Portals

Online trainings offer powerful reporting dashboards that provide real-time insight into progress at the organization, team, and individual level. This helps you identify obstacles and opportunities along your path to success.

Standard or organization-specific learner portals also deliver highly-personalized, interactive learning experiences across both desktops and mobile devices. This keeps learners engaged, enables anytime/anywhere training access, and guides them to relevant content that expands their expertise.

14 Role-based courses

80% of courseworks is hands-on

19,000+ certified users

175+ course videos

20+ hours of specialty courses

44,000+ certifications

## About Tricentis

With the industry's #1 Continuous Testing platform, Tricentis is recognized for reinventing software testing for DevOps. Through risk-based testing, scriptless end-to-end test automation, and the industry's most extensive technology support, Tricentis breaks through the barriers experienced with conventional software testing methods. Our innovative technologies simplify testing for even the most complex enterprise applications—transforming testing from a roadblock to a catalyst for innovation.
