Tricentis

Quality Engineering Platform

Everything you need to deliver quality software at DevOps speed!

MANAGE		AUTOMATE		OPTIMIZE		SCALE	
Agile Test Management	Test Mgmt within Jira	Visual AI	Rapid Authoring	Impact Analysis	Risk AI	Shift-left performance engineering	Execution at scale
Exploratory Testing	Native CICD integration	Codeless Automation (MBT)	Self-healing AI	Test Coverage	Test Maintenance	Browser &Ê Protocol	Bottleneck analysis
Test Orchestration	Digital Validation	Data Integrity	Mobile Testing	Test Data Management	Service virtualization	Open source enabled	Device Cloud integration
		E2E Business Processes	Native SAP, Salesforce, ServiceNow	Analytics & Reporting			

ENTERPRISE APP AND QA TEAMS

Tricentis Tosca

Tosca optimizes and accelerates end-to-end testing of your entire digital landscape. Its codeless, AI-powered approach accelerates innovation across your enterprise by taking the bottlenecks out of testing and the risks out of software releases.

Tricentis Test Automation

Tricentis Test Automation (SaaS) modernizes model-based testing for web applications, APIs/microservices, and multi-app processes. It's easy to use, scalable, and built to handle changes gracefully.

PLATFORM ADMIN & DEV TEAMS

Tricentis Test Automation for Salesforce

Fast and scalable test creation and execution for Salesforce professionals of all skill levels to improve the quality of DevOps, upgrades, applications, and customizations. Using the no-code recorder or test builder, your team can create and manage test cases for end-to-end Salesforce testing.

Tricentis Test Automation for ServiceNow

Speed up deployments and developer velocity with continuous automated testing. Designed for ServiceNow professionals of all skill levels and devops ready, the no-code recorder and instant test-case creator provides your team with end-to-end ServiceNow testing to support unit, application, and workflow testing.

Tricentis Testim

Tricentis Testim accelerates UI testing with highly resilient tests for custom web applications. The SaaS-based, AI-powered platform scales to help Agile teams accelerate releases.

Test Management

Test management for every type of organization, and every kind of project.

ENTERPRISE QA TEAMS

Tricentis qTest

Centralized, scalable test management to help businesses manage and orchestrate quality at speed, with visibility throughout the software development lifecycle.

LIFE SCIENCES TEAMS

Tricentis Vera

Tricentis Vera™ is a leading digital validation solution for life sciences organizations to enhance and accelerate critical approval, verification, and compliance management processes.

AGILE DEV TEAMS

Tricentis Test Management for Jira

Test management inside Jira Cloud to keep QA, development, and product teams in sync to deliver quality software, faster.

Performance, Data, and Change Intelligence

Innovative automation for specific use cases

PERFORMANCE TESTING

Tricentis NeoLoad

NeoLoad provides the ability to quickly and easily build continuous performance and load testing for all use cases, from APIs and microservices to end-to-end system-wide testing of monolithic applications.

DATA INTEGRITY TESTING

Tricentis Data Integrity

Tricentis Data Integrity helps ensure that your data arrives intact and fit for purpose as it travels between your source systems and data warehouse to your reports, dashboards, and business processes.

CHANGE INTELLIGENCE FOR SAP

Tricentis LiveCompare

LiveCompare provides SAP teams with AI-powered analytics and insights that significantly reduce the risk, time, and cost of delivering and supporting changes to SAP solutions, including SAP S/4HANA migrations.
