

AI-powered Quality Engineering Platform

Elevate quality engineering with the power of AI

For any app on any infrastructure, our AI-augmented quality engineering platform helps you test smarter, release faster, and reduce costs along the way.

A COMPREHENSIVE AI-POWERED QUALITY ENGINEERING PLATFORM

TRICENTIS SUPPORTS EVERY STEP OF YOUR QUALITY ENGINEERING JOURNEY

Test Management

Test management for every type of organization, and every kind of project.

ENTERPRISE QA TEAMS

Tricentis qTest

Centralized, scalable test management to help businesses manage and orchestrate quality at speed, with visibility throughout the software development lifecycle.

Coming soon: qTest Copilot! Leverage the power of generative AI to automatically draft manual test cases including test steps and expected results.

PRODUCT DEVELOPMENT TEAMS

Tricentis Test Management for Jira

AI-powered test management native in Jira helps QA and development teams plan, evaluate, monitor, and deliver quality software.

LIFE SCIENCES TEAMS

Tricentis Vera

Tricentis Vera is a leading digital validation solution for life sciences organizations to enhance and accelerate critical approval, verification, and compliance management processes.

Quality Intelligence

Test optimization to know what to test and when to test

CHANGE INTELLIGENCE FOR CUSTOM DEVELOPMENT TEAMS

SeaLights

SeaLights' AI-enabled capabilities assess the risk of untested code changes before production to shorten testing cycle times by skipping irrelevant test executions. SeaLights supports every test type including unit, end-to-end, regression, integration, API, and more. Tricentis acquired SeaLights in July 2024.

CHANGE INTELLIGENCE FOR SAP

Live Compare

LiveCompare provides AI-powered analytics and insights that significantly reduce the risk, time, and cost of delivering and supporting changes to SAP solutions, including SAP S/4HANA.

Test Automation

Test automation tools designed for the specific needs of your team

ENTERPRISE APP AND QA TEAMS

Tricentis Tosca

Tricentis Tosca optimizes and accelerates end-to-end testing of your entire digital landscape, including APIs, web, enterprise apps, simulations, and everything in between. With the flexibility of both on-prem and cloud deployments, Tosca's codeless, AI-powered approach accelerates innovation across your enterprise by taking the bottlenecks out of testing and risks out of software releases.

Tricentis Tosca Mobile helps testers integrate mobile testing into their broader testing strategy.

Tricentis Device Cloud is a real device farm enabling cloud test authoring and execution on actual smartphones, tablets, iPhones and more. It combines Mobile AI for enhanced user experience and performance analytics, helping organizations deliver flawless mobile experiences.

● **New! Tosca Copilot** enhances productivity by optimizing test portfolios, explaining complex test cases, and summarizing execution insights. Seamlessly integrated within Tosca, it boosts application quality and accelerates onboarding while ensuring responsible usage, safety, and accessibility.

● **PRODUCT DEVELOPMENT TEAMS**

Tricentis Testim

Tricentis Testim provides AI-powered testing for custom web, mobile, and Salesforce applications. Its low-code authoring enables product development teams to create tests faster and AI-powered locators keep tests working, reducing maintenance.

Testim Mobile extends these capabilities of Testim to iOS and Android mobile applications.

Testim Salesforce, built for Salesforce professionals, provides test automation and pre-built steps that makes it easier and faster to ensure Salesforce quality without the need for code.

● **New! Testim Copilot** accelerates application development by automatically generating test steps from a text description, explaining code to make it easier to understand and reuse, and identifying and fixing test issues. Testim Copilot speeds up test creation, increases test quality, and allows development teams to test complex applications more easily.

Scale

Innovative automation for specific use cases

PERFORMANCE TESTING

Tricentis NeoLoad

Tricentis NeoLoad is a complete performance testing solution to easily design, execute, and share actionable performance insights across teams. Identify bottlenecks quickly, early, and with minimal effort – so you can deliver quality products that perform in real life scenarios.

DATA INTEGRITY TESTING

Tricentis Data Integrity

Tricentis Data Integrity is a risk mitigation tool that helps test data as it moves through increasingly complex landscapes. It ensures that your data arrives intact and fit for purpose as it travels between source systems, data warehouses, to your reports, dashboards and business processes.

Consulting services

Achieve your transformation goals with our industry-leading, global professional services and consulting team.

We offer tailored services packages to meet your unique requirements. These services are designed to enhance your usage of Tricentis solutions, unlocking their full potential. With our product packages, you will be fully equipped to accelerate and maximize the value you get from our solutions.

Academy

The Tricentis Academy is here to maximize your productivity with Tricentis products.

ShiftSync

ShiftSync, a community for developers, testers and DevOps specialists.
